Edit Tags

The diagram illustrates the 'Edit Tags' dialog box, which is a window with a dark gray border. Inside, the title 'Edit Tags' is at the top. Below it is a table with two columns: 'Tag Name' and 'Tag Value'. The table is currently empty, displaying the text 'No content in table'. At the bottom of the dialog, there is a row of controls: a 'Tag' menu button with a dropdown arrow, a 'Tag Value' text field, an 'Add' button, a 'Remove' button, and an 'OK' button. Red arrows point from external labels to these components: 'Label' points to the title, 'TableView' points to the table area, 'MenuButton' points to the 'Tag' menu, 'Button' points to the 'Remove' button, 'TextField' points to the 'Tag Value' field, and another 'Button' points to the 'Add' button.
